

N.A Energy Resources Corp. Announces Its Review of Oil & Gas Prospects

July 26, 2012

VANCOUVER, BRITISH COLUMBIA – N.A Energy Resources Corp. has begun its search and analysis of key properties located in Tennessee, Kentucky & Saskatchewan. The properties will go through vigorous market and reservoir analysis in order for the most profitable and highest geological evaluated properties to be chosen.

Energy Resources is pleased to announce that the Company is currently reviewing a portfolio of Oil & Gas projects located in Tennessee, Kentucky & Saskatchewan.

The proposed projects bring together a variety of advanced and early stage opportunities thereby allowing Energy Resources the ability to develop projects encompassing a mix of project development stages, from permitting and licensing through to near completion. As part of its overall strategy the Company aims to acquire assets that are near term in regards to a potential revenue stream. The strategic advantage of the limited partnerships that ERC puts forward consists of a key combination of properties with different characteristics that come into effect at different stages of the projects life span.

Energy Resources is working closely with industry professionals whom bring reliable Oil & Gas Operations both in Canada and the United States. Energy Resources strategic plan is focused on the development of an effectively managed "conventional" and "unconventional" energy company, offering an aligned portfolio of secure Crude Oil and Natural Gas assets.

After extensive geological & reservoir analysis, only the best fit properties will be chosen and injected into ERC's next limited partnership fund. This fund is expected to be launched in the first quarter of 2013.

ON BEHALF OF THE BOARD

"Mehran Ehsan"

President & Director
